GOUTAM GUPTA

Full-Stack MERN Architect & Android App Developer

Kolkata, WB | +91 8343957187 | goutamgupta605@gmail.com | linkedin.com/in/goutam-gupta | github.com/G870-ops

PROFESSIONAL SUMMARY

Innovative Full-Stack MERN Architect and Native Android Developer with proven expertise in building scalable, real-time web applications, low-latency WebSocket engines, and edge AI mobile systems. Proficient in React.js, Node.js, Express, MongoDB, Java, Kotlin, and Gemini AI. Demonstrated success architecting microservices, RESTful APIs, role-based security architectures, and automated financial/educational pipelines with a strong commitment to clean code principles, high-performance rendering, and seamless cloud deployments.

TECHNICAL SKILLS MATRIX

- **Frontend Engineering:** React.js, Vite, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive UI/UX
- **Backend & APIs:** Node.js, Express.js, RESTful APIs, JWT Authentication, Nodemailer, WebSocket, Microservices, PHP
- **Mobile & Edge AI:** Android Studio, Java, Kotlin, Android SDK, Material 3, MPAndroidChart, Firebase, TFLite, OpenCV
- **Database Systems:** MongoDB Atlas, MySQL, NoSQL Document Design, Relational Database Modeling, Schema Optimization
- **Tools & Integrations:** Git, GitHub, VS Code, Postman, Linux/WSL, Stripe API, Google Gemini AI, Agile Development

FEATURED ENGINEERING PROJECTS

School Management System | Full Stack Web Platform

[Live Demo: https://school-management-system-lyart-zeta.vercel.app/login | Source: https://github.com/G870-ops/School-Management-System]

- Architected an enterprise School Management System with role-based access control for Admins, Teachers, Students, and Parents.
- Engineered robust JWT authentication, Bcrypt password encryption, and Nodemailer OTP verification for secure login sessions.
- Integrated AI-powered automated notification and fee reminders utilizing the Google Gemini API with real-time academic records.

Neo Chess - Real-Time Multiplayer Engine | Mobile & WebSocket Engine

[Install APK: https://github.com/G870-ops/NEO_CHESS_GAME_APP/releases/download/v1.0.0/chess.apk | Source: https://github.com/G870-ops/NEO_CHESS_GA

- Engineered a real-time multiplayer chess platform combining a native Android wrapper with a low-latency web game engine.
- Built Node.js WebSocket backend server handling concurrent player matchmaking, move synchronizations, and turn rule validations.
- Distributed standalone Android APK package with zero-latency board responsiveness and cross-device match sessions.

Cow Business - AI Dairy Farm Calculator | Android Fintech & Analytics App

[Install APK: https://github.com/G870-ops/Cow_Business_App/releases/download/v1.0.0/cow_business.apk | Source: https://github.com/G870-ops/Cow_Business_A

- Developed native Android agribusiness application to calculate, forecast, and optimize dairy farm commercial profitability.
- Implemented reducing-balance loan EMI calculation algorithms and interactive visual cashflow charts using MPAndroidChart.
- Integrated an automated PDF document generator (PdfDocument) for exporting and sharing comprehensive business yield reports.

Sci-Fi Scientific Calculator | Native Android Application

[Install APK: https://github.com/G870-ops/Scientifc_calculator_project/releases/download/v1.0.0/Scie.Cal.apk | Source: https://github.com/G870-ops/Scientifc_calcula

- Engineered advanced Android scientific calculator featuring an interstellar cyberpunk UI, matrix solvers, and complex equations.
- Programmed custom Java/Kotlin BigDecimal mathematical precision core preventing floating-point inaccuracies in conversions.
- Packaged and distributed production-ready Android APK with built-in physics constants and mathematical reference tables.

Invitor (Event Booking) Website | Full Stack Event Management

[Live Demo: https://event-booking-web-app-seven.vercel.app/ | Source: https://github.com/G870-ops/Event_Booking_WebApp]

- Developed a modern Event Booking management web platform featuring dynamic role-based administrative and client dashboards.
- Constructed a high-velocity responsive interface with Tailwind CSS and Vite for optimized performance across devices.
- Conducted automated API testing and validation with Postman collections to ensure zero-regression backend communications.

Full Stack Food Delivery Website | Full Stack MERN Platform

[Live Demo: https://food-dev-frontend.vercel.app/ | Source: https://github.com/G870-ops/FOOD_DEV_FRONTEND]

- Engineered end-to-end food ordering platform featuring live order status telemetry and reactive cart state management.
- Integrated Stripe payment gateway for seamless, encrypted credit/debit transactions with automated webhook verification.
- Designed scalable backend REST microservices backed by MongoDB Atlas for real-time menu queries and user order histories.

EDUCATION

Bachelor of Technology (B.Tech) in Information Technology (2023 - 2026)
Kalyani Government Engineering College (KGEC / MAKAUT) â 6.55 CGPA (Up to 8th Semester)

Diploma in Electronics & Telecommunication Engineering (ETCE) (2020 - 2023)
Purulia Polytechnic (W.B.S.C.T.E) â Score: 79.9%

Higher Secondary (10+2 Science) (2018 - 2020)
Sodepur Colliery High School (W.B.C.H.S.E) â Score: 84.4%

Secondary School Education (10th Standard) (2018)
Sodepur Colliery High School (W.B.B.S.E) â Score: 59.86%

HONORS & CERTIFICATIONS

- WBJELET Engineering State Joint Entrance Exam: General Rank 170 | OBC Rank 26 (Top Tier State Placement)
- Robo Fight Competition: Secured 3rd Position representing Purulia Polytechnic in tactical robotics combat matchup
- Professional Full Stack Systems Certification: Certified in Modern Web Frameworks, CSS/Bootstrap, JavaScript, and PHP
- Domestic Data Entry Operator (DDEO): Certified in database operational maintenance and speed typing
